DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-17 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 6-7, 12, and 16-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Nakatsugawa et al. (2002/0186679).

Regarding claims 1, 6, Nakatsugawa discloses a mobile supporting router comprising:

a packet analyzer, which receives a packet and analyzes the packet (see fig.6 element 13-2, paragraph [0120] and its description)

a database, which stores information indicating whether said at least one home agent operates normally according to the result of the analysis (see fig.6 element 13-2, paragraph [0015] and its description); and

Art Unit: 2617

a home agent function executor, which performs a home agent function in place of said at least one home agent when said at least one home agent does not operate normally (see fig.6, element 11, paragraph [0181] and its description).

Regarding claim 7, 12, and 16-17, Nakatsugawa discloses a mobile supporting router comprising:

determining whether a home agent operates normally using a database, which stores information on home agents that do not operate normally (see fig.6, element 11, paragraph [0181], fig.30 and its description); and

when it is determined that the home agent does not operate normally, performing a home agent function in place of the home agent (see fig.6, elements 11, 13-2, paragraphs [0015], [0181], fig.30 and its description).

Allowable Subject Matter

4. Claims 2-5, and 8-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 13-15 are allowed.
